About the survey: *The Post Poll survey was conducted between February 11 and March 9, 2022 among 7211 voters at 280 polling stations spread across 70 assembly constituencies of Uttar Pradesh. The sampling design adopted was multi-stage systematic random sampling. The Assembly Constituencies were randomly selected using the probability proportional to size method. Thereafter, four polling stations within each of the sampled constituencies were selected using the systematic random sampling method. Within each polling station, 40 voters were randomly sampled from the electoral roll using the systematic random sampling method. Of these 40, 26 interviews were targeted. The interviews of electors were conducted face-to-face at their homes after voting had taken place in their area. The findings shown here have been weighted by gender, religion, locality, and caste group based on Census 2011 data and by the actual vote shares secured by the main parties/ alliances - the BJP alliance, the SP alliance, the BSP and the Congress - in the election.*
