About the survey: *The Post Poll survey was conducted between February 15 and 25, 2022 among 2066 electors at 80 polling stations spread across 20 assembly constituencies of Goa. The sampling design adopted was multi-stage systematic random sampling. First, every alternate assembly constituency was selected. Thereafter, four polling stations within each of the sampled constituencies were selected using the systematic random sampling method. Within each polling station, 40 electors were randomly sampled from the electoral roll using the systematic random sampling method. Of these 40, 26 interviews were targeted. The interviews of electors were conducted face-to-face at their homes after voting had taken place in their area. The findings shown here have been weighted by gender, religion, and caste group based on Census 2011 data and by the actual vote shares secured by the main parties/alliances - BJP, Congress-GFP alliance, AITC-MGP alliance, AAP and Revolutionary Goans - in the election.*
